 200+ Enterprise Datasources

Zero-ETL support for all major large-scale enterprise datasources

Industry-leading tech partners

Backed by top investors

CHALLENGE

Traditional Analytics are too slow & siloed for Insights

Your teams are blocked—not by lack of data, but by BI and dashboards handed to them.

Alternatively, learning SQL to get answers on demand presents a steep learning curve for non-technical users.

Fragmented data silos & overburdened data teams

Rigid dashboards & limited exploration

Reactive reporting & insight latency

CHALLENGE

In Service of the Customer...

Data across the customer journey is siloed and hard to connect.

Application Native AI only tells part of the story.

Hubspot for Marketing
Are we nurturing this customer?

Salesforce for Sales & Service
Who's our Champion? Renewal date?

Postgres for Product telemetry
Are they using it? Successfully?

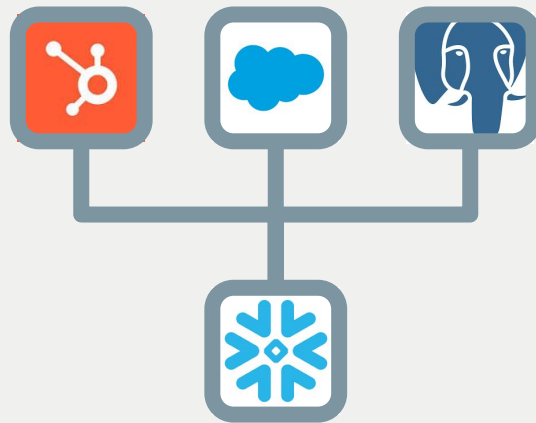

CHALLENGE

DWH - Better or Worse?

Enterprise have invested in data pipelines, data warehouses, data fabrics, etc...

At a material sacrifice to speed and actionable insights.

Normalizing Data
Not everything lines up

User Permissions
A whole new set of access issues

Do you know what/how to build?!?!?
Just to ask questions

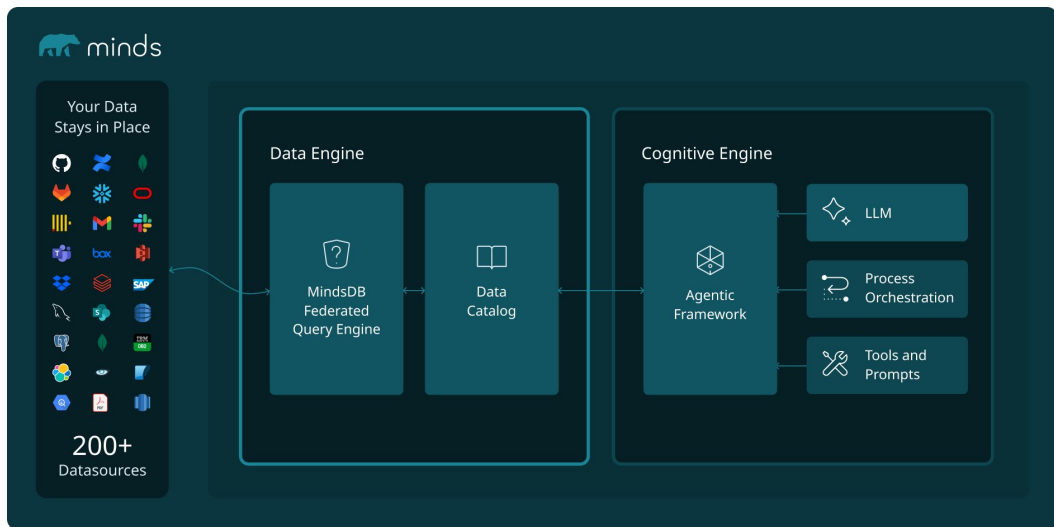

SOLUTION

Unblock your teams with the answers they need - in seconds - with **Minds Enterprise**.

AI for real-time decision-making,
straight from your
data (No ETL required):

- Works with hundreds of datasources
- Ask in plain English, get one answer
- Deploy in the Cloud, On-prem, or Hybrid
- Transparent AI reasoning for compliant, explainable outputs

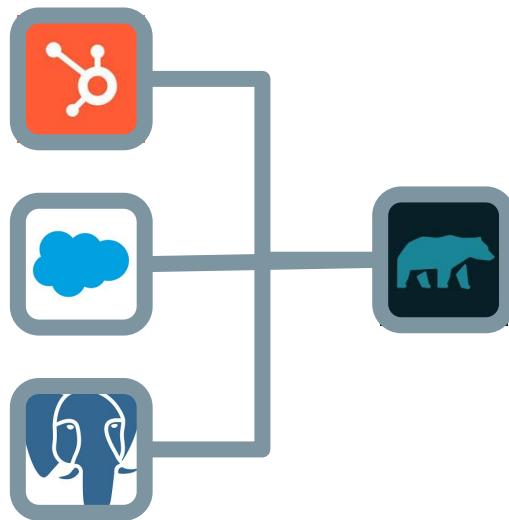

SOLUTION

A single question, a single answer

Insights across all data sources

In service of your customer:

- Ask in our UI
- Deliver to your Agent of Choice
- Embed into your Products

Why This Matters?

Better customer experience

Enables Self Service

Ability to ask across systems as a User

More informed interactions

No gaps in understanding

Trust remains

Respecting access to current systems

Speed!

No lost opportunity cost
